

The Waverly School

INDUSTRY

Education (independent / K-12 school)

COMPANY SIZE

60

RELATIONSHIP

Long-standing Pro Link Systems client — approximately 23 years

THE CHALLENGE

As a school, Waverly runs on technology that has to serve two very different populations at once — staff who depend on reliable administrative systems, and students who hold their own accounts. The environment needs to be secure, easy to administer, and dependable across the school year, without a large in-house IT team to run it.

THE SOLUTION

Pro Link Systems acts as The Waverly School's outsourced IT department. Verified elements of the engagement:

- Management and support of the school's **Google Workspace** environment, covering both staff and student accounts

THE RESULTS

- An approximately two-decade-plus managed-IT relationship — among Pro Link's longest-tenured clients
