

# Navigate Technology with Confidence.

**AVANTI SENIOR LIVING** is an assisted living and memory care facility with locations in Texas, Louisiana, and Arizona. The facility is devoted to providing an elevated level of care to all residents, and state of the art technology is central to their goal. When they needed a new MSP, 1Path was thrilled to lend a hand. And since joining forces, Avanti has continued to grow, extend its reach, and provide optimal support and services to all its residents.

Before partnering with 1Path, Avanti worked with an MSP that was specifically geared toward senior living facilities. However, this MSP was unable to provide the level of quality support Avanti needed. Specifically, they required a mobile device management platform to help manage their iPods and nurse call system; if their nurse call line didn't work, they'd be unable to function as a business. Additionally, they wanted an MSP who understood the central role HIPAA compliance played in daily operations.

As Avanti continues to expand, it's important that they have the best wireless tech available. For this reason, 1Path installed Cisco Meraki in each building, and we added AT&T circuits to many of their locations. We've also helped manage their O365 and local servers, and we're always there to lend advice.

1Path has worked with Avanti to implement the same technology stacks at each of their new communities, which allows for a reliable infrastructure for their staff and residents.

We were looking for a company that would provide good strategic solutions and manage our tech. Our facilities aren't geographically close, so staying in touch is key. We have so much tech in our buildings to support everything, and our networks are incredibly complex. Basically, we have lot of tech that requires a lot of help, and by trusting 1Path to manage our systems, we're able to spend more time delivering quality care to our residents."

# Navigate Technology with Confidence.

Since joining with 1Path, Avanti Senior Living has had consistent uptime, excellent cybersecurity, and an effective unified communications setup. Our numbers are a clear indication that working with 1Path has been a success:

Over the last 3 months **30 PHISHING ATTACKS** were identified and stopped

**153 MALWARE ATTACKS** have been thwarted

YTD response time:  
**25 MINUTES**

YTD:  
**4.86 QA RESULTS**

For Avanti, having a reliable means of communications is a must. In case of emergencies, our tech needs to be functioning as intended. And with 1Path, that's always the case. Additionally, because we handle healthcare data, it's important that our MSP implement all security precautions. With 1Path, we're getting proactive services to prevent any issues, which ultimately makes us better prepared, better educated, and better equipped to handle our day-to-day tasks."
