Purpose built network for the road ahead

Bituminous Products approached Boost IT after getting frustrated with other network service providers. They were quoting over-the-top prices for designing and implementing a new network.

"Boost IT have looked after our company IT needs for over 5 years now and we are very happy with their service. Whilst we are a small to medium sized company, we have multi-sites Australia wide and require all manner of support as and when the need occurs. Boost IT have delivered promptly and professionally on all that we have requested of them and I am happy to recommend their services to others."

Neil Morcombe, Managing Director,
Bituminous Products

Bituminous Products specialises in the manufacture and supply of bitumen based and associated products for road surfacing and general industrial use. Bituminous Products has grown steadily to present-day operations which include manufacturing facilities in Sydney, Melbourne, Brisbane, Perth and Townsville, along with 2 mobile blending plants for remote location operations.

RESULT

- The installation of new WAN links and all required hardware and software to Bituminous Products offices across Australia

- The setup of a Microsoft Exchange cloud-based solution to drive down admin overhead and help service the fleet of IP phone users

- VMware to drive down server hardware costs and set up two Virtual Servers on one hardware platform

CONCLUSION

Bituminous Products new network facilitated its business efficiency with the right communication strategy, all integrated with long-run cost-saving IT solutions.
