

Customer Success Story

Porsche Informatik.

Using Nordcloud's Azure Cloud Foundation to deliver a best in class Cloud environment and industry leading applications.

30%

less deployment cost vs previous public cloud platform

10x

more native services covered vs previous public cloud foundation

Scale

scales up to 300++ independent workloads/ applications

90%

Porsche Informatik's goal for reduction in time to market for corporate services

Challenge.

Porsche Informatik's mission was to deliver innovative and agile services to market at a rapid pace. As part of this digitization journey meeting the needs of a number of internal stakeholders was key.

The business wanted to utilise public cloud as a way to significantly increase agility, opportunities for innovation, and security. As a solution partner for the automotive trading industry, have a highly effective scalable solution was vital. Porsche Informatik also wanted to empower their own technical staff to develop cloud skills during the process.

Based on these requirements Porsche Informatik selected Nordcloud as an experienced service provider for setting up new cloud foundation for their needs following all best practise.

Solution.

Cloud Enablement

Porsche Informatik's journey to a solid Cloud Foundation, started with Nordcloud's - Cloud Enablement Workshop. This workshop is designed to define the cloud governance model that will be used, support model & security policies to ensure that they align with best-practices and business demand.

Establish Environment

Based on the findings from the Cloud Enablement Workshop, a secure, highly automated and cost effective public cloud environment was built in Microsoft Azure, using Nordcloud's pre-defined cloud foundation solutions.

Expert Upskilling

Throughout the deployment, Porsche Informatik's experts were upskilled by Nordcloud's team. This proved an effective and cost effective way to develop the skills required, where practical skills were taught to administer the foundation solution.

With Nordcloud we have found a partner who accompanies us on our cloud journey in an agile, professional and unbureaucratic way. With Nordcloud as a partner, I am looking forward to further developing the Cloud Foundation and scaling it to our broad areas of application."

Results.

Nordcloud's delivered an Azure cloud foundation, creating a robust, scalable and secure cloud environment. This was achieved with rapid and accurate delivery, built with close cooperation between Nordcloud and Porsche Informatik. As a result this now enables Porsche informatik's expert employees to focus on their key daily projects.

By setting up the cloud governance model, support structures and security policies, it is guaranteed that every best practice is in place to enable highly effective migration and innovation projects deployed on the public cloud. With ongoing support from Nordcloud, using the cloud in a secure and scalable way has never been easier.
