About ITC

ITC has over two decades of experience delivering cyber security solutions to organisations in over 180 countries.

At the heart of ITC's cyber services is a London based, 24-hour, manned Security Operations Centre. From this centre of excellence, ITC's teams deliver high quality managed security services to help organisations manage the growing complexity of cyber threats and securely support their digital transformation.

ITC's cyber advisors support customers from our London and Washington DC offices, driving cyber security change inside organisations and helping them make the right security investment choices.

ITC is making the digital world a safer place to do business.

International legal firm DAC Beachcroft chooses ITC as its Managed Security Service Provider

DAC Beachcroft (DAC) is a full-service law firm offering corporate and commercial expertise alongside market-leading sector knowledge in insurance, healthcare and real estate.

The Customer Ask

With limited visibility of security events and incidents across their network along with the security supply chain, DAC were asked by their customers to invest in a Security Information and Event Management (SIEM) platform.

ITC, the trusted managed security service provider, were approached by DAC to deliver a solution and fulfil the need for a robust managed security service.

Overview

Industry
Legal sector

Environment
Over 2,300 employees

Headquartered in Bristol, UK

With offices across the UK, Europe, Asia-Pacific, Latin America and North America

Challenges
Size of the estate and the number of critical systems that the customer needed to protect, along with budget constraints.

Solution
ITC designed, deployed and integrated full security, network and performance management.

ITC's Managed SIEM service delivers 24x7x365 real-time incident reporting and log analysis.

The Solution

Following workshops to further understand DAC's business and customer requirements, ITC proposed its Managed SIEM service, to provide real time alerting, reporting and 24/7 incident management.

ITC used its 5-Steps to Security model to deliver the Managed SIEM service successfully:

1. Deploy a centralised logging platform
2. Build an asset model
3. Implement vulnerability assessment
4. Implement SIEM
5. Implement dynamic threat feeds

This solution delivers secure management of multiple use-cases, plus threat monitoring including; threat hunting, suspicious behaviour, DDOS protection, anti-virus alerting and more.

In addition, ITC's 24 hour, Security Operations Centre provide depth to incidents and alerts raised, by carrying out investigation and remediation to determine risks posed to DAC's business, assets and customers.

The Results

ITC's solution addressed the following business requirements for DAC:

• Audit and regulatory compliance
• DAC's business and customer requirements
• Protection of key business assets

ITC's Managed SIEM service solution delivers proactive monitoring and protection of DAC's key business assets, providing 24x7x365 management of DAC's infrastructure with real-time incident reporting and log analysis.

Additionally, DAC have found a trusted and accountable partner in ITC to deliver security expertise long-term. Resulting in DAC being more secure, more competitive and more successful.

"Being behind the curve in cyber security just isn't an option, especially in the Legal sector where firms are under attack from all prominent threat actors. As there is no single threat, there can be no single solution, cultivating the level of skills needed to cope with an ever-evolving landscape was impractical, so I needed to find a partner organisation who would go beyond selling and become the living, breathing cyber-arm of my own IT team, and we found that in ITC".
