

# Simplified IT, Enhanced Productivity.

How Nvicon led Chapman Ventilation's digital transformation.

**Sector:**  
Manufacturing

**Employees:**  
120

After a smooth Microsoft 365 migration project, Chapman Ventilation selected Nvicon as their long-term Managed Services Provider (MSP) in 2025, entrusting us with a major IT transformation project.

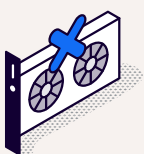

Nvicon stepped in, making a complex requirement, easy to understand, highlighting the importance of having a trusted MSP when navigating these challenges.

## Business challenges

### Limited Internal Resources

Internal team stretched and unable to keep up with the growing demands of IT within the business.

### Unsupported Infrastructure

In need of an overhaul to support modern business operations and maintain compliance standards.

### Increasing Cyber Threats

Requiring more robust security measures to protect data and operations.

## Business outcomes

### Infrastructure & Networking Upgrades

Implementation of comprehensive upgrades to infrastructure and networking for a robust and scalable foundation.

### Microsoft 365 Migration

Enabling user collaboration and productivity with a seamless migration of Mail & Files.

### Preventing Cyber Threats

Implementation of advanced security measures, and threat detection and response, to safeguard users and infrastructure.

Since implementing and onboarding with Nviron, Chapman Ventilation have experienced significant improvements in their IT capabilities providing a solid foundation for business growth.

“Working with Nviron has been a game-changer for Chapman Ventilation. Their expertise and dedication to delivering a tailored IT solution have significantly improved our operational efficiency and security. We value their proactive support and commitment to helping us stay ahead in a constantly evolving digital landscape.

Chris Cottell, Finance Director
