"I am astonished by the capabilities of this system. Within one week of implementation it helped us get a Grade 1 Quality Audit from a major customer" Mike Walshe —Director

The challenge - better system, better processes

Flow Control Solutions Ltd recognised the need to make a step change to cope with their business requirements and ambitions. Having outgrown Sage50 the focus was on improved capacity, robustness and functionality.

The Sage ERP Accpac Commercials Suite fulfilled all this and more. The bonus was that it also contains most of the capabilities of an industry specific system but at a fraction of the cost.

Along with the genuinely integrated Document Management System it was a winner all round.

A complex but well managed implementation resulted in a smooth migration to a system that includes:

- ♦ Full ordering cycle from sales order to purchase order, stock control, delivery and invoicing.
- ♦ Serial number tracking throughout.
- ♦ Full pricing, margin checks and authorisations.
- ♦ Document attachments on all transactions including sales orders, purchase orders and deliveries.
- ♦ Clear and accurate financials with Cost of Goods Sold and stock Balance Sheet values.
- ♦ Drill-down visibility of what's due out and in on sales and purchase orders.
- ♦ Robust technically recognised architecture using industry standard Microsoft SQL database.

Certificate No. 6967
