CYBANETIX CHRONICLES

GBG MINIMISES RISKS BY LEVERAGING THE EXPERTISE OF THE CYBANETIX SOC

- *With 19 locations and over 1000 employees, GBG are quickly becoming a market leader in fighting fraud*

- *This rapidly growing data intelligence organisation identified the risk that comes with success*

- *Using industry-leading technology to provide themselves with a flexible and effective solution*

- *Maximising its capabilities by putting it into the hands of a trusted advisor, avoiding costly changes*

THE RISK OF GROWTH

As GBG continued to grow into a market leader in fraud and data intelligence, they were increasingly wary of the lack of visibility and detection within their infrastructure. Their constant expansion meant immense pressure on the IT team to ensure the ever-evolving infrastructure is secure and monitored around the clock. After considerable research, they decided to invest in developing their very own SOC.

THE RIGHT SOLUTION

This is where they came across Exabeam and Cybanetix. GBG was impressed by Exabeam's use of UEBA technology, which allowed them to monitor their organisation and provided real-time alerts to any suspicious behaviour. With the additional ability to integrate with other security solutions, Exabeam gave GBG the capacity to be flexible and adapt to future changes in their growing infrastructure.

THE RIGHT PAIR OF HANDS

However, managing and maintaining an effective SOC would mean even greater stress on GBG's IT Team. Not only was Cybanetix highly experienced with Exabeam and the SOC industry. They also adopted a "Support first" approach, ensuring the service provided will not be affected by future growth. The same approach was also adopted in Cybanetix's very straightforward and scalable pricing model. Meaning that it became more cost-effective to outsource GBG's entire SOC operation to Cybanetix, allowing GBG to focus purely on their success.

"

It wasn't easy to find a SOC service that met all of our security needs whilst also capable of sustaining GBG's continued growth. However, when we came across Cybanetix, they were not only extremely knowledgeable about the technology but also provided a pricing model that was scalable and flexible enough for our growing infrastructure. On top of all of that, Cybanetix also provided a fantastic service which made the whole process very enjoyable."

Mandy Cape
Head of Technical Security at GBG
