# EMPOWERING EDUCATION WITH TECHNOLOGY THROUGH THE JOSKOS AND THE CORE TRUST PARTNERSHIP

Joskos Solutions, a true IT Change Leadership partner for schools and MATs, is dedicated to leveraging technology to enhance learning environments and educational outcomes. Our expertise lies in creating and implementing tailored technological solutions that align with the unique needs and aspirations of schools and Trusts.

The CORE Education Trust, based in Birmingham, is a beacon of educational excellence, committed to transforming the lives of young people through its fundamental values of Collaboration, Opportunity, Respect, and Excellence.

**Faced with the challenge of modernising its IT infrastructure to further its mission, the CORE Trust partnered with Joskos to embark on an ambitious journey of digital transformation.**

The partnership aimed to overhaul the technological landscape across the CORE Education Trust's academies, introducing a full managed service that would not only modernise infrastructure but also enhance educational delivery and communication within the Trust.

This partnership was characterised by a deep-seated commitment to understanding and fulfilling the CORE Education Trust's vision. Joskos worked closely with the Trust, embracing a collaborative approach that ensured the technological solutions provided were not only state-of-the-art but also perfectly aligned with the Trust's values and educational goals.

## Exceptional Outcomes

The collaboration between Joskos and the CORE Education Trust has led to transformative outcomes, significantly enhancing the educational experience for staff and students alike.

The new IT infrastructure has laid the foundation for a more interactive, engaging, and efficient learning environment. Teachers and students are now better equipped with the tools they need for success, fostering a culture of excellence and innovation.

# KEY ACHIEVEMENTS AND OUTCOMES

- Establishing a brand new switch and Wi-Fi infrastructure at three schools to ensure robust and reliable connectivity.
- Migrating all Trust operations to the cloud, enabling efficient, scalable, and flexible educational and administrative processes.
- Implementing a new broadband service and VOIP telephony system to improve communication.
- Centralising services including Senso Safeguarding and Salamander Account management to streamline operations.
- Supporting a major capital project at a secondary school, integrating advanced technological solutions.
- Designing a new Teams and SharePoint environment to foster trust-wide communication and collaboration.
- Introducing new Lenovo end-user devices to facilitate modern learning methodologies.
- Conducting significant AV installations to enhance the interactive learning experience.

The centralisation of services and migration to cloud-based operations have streamlined administrative processes, allowing the Trust to focus more on its core mission of education. The new communication and collaboration platforms have brought the Trust's academies closer together, enabling a more unified and cohesive educational community.

**The successful partnership between Joskos and the CORE Education Trust exemplifies the transformative power of technology in education when aligned with a MAT's mission and values.**
