

SD-WAN · CYBER SECURITY · NETWORK MODERNISATION

# Modernising a Network for **LEGEND.**

INDUSTRY  
**Distribution**

LOCATION  
**Australia**

SOLUTION  
**SD-WAN + Managed Cyber**

OUTCOME  
**Secure & Resilient Network**

“Working with Virtuelle has been transformative for our company. Their implementation of the SD-WAN solution and managed cyber security service has not only fortified our network against potential threats but also significantly improved our overall network performance.”

— Jonas Masakadza, Group IT Manager, Legend Brands

THE CHALLENGE

## A Legacy Network Holding Growth Back

Legend had outgrown their legacy network infrastructure. As a leading provider of electrical products, their operations demanded a flexible, high-performance network — but what they had was rigid, hard to scale, and increasingly exposed to cyber threats.

**Rigid Legacy Network**  
Legacy infrastructure was inflexible and unable to scale with the demands of a growing multi-location business.

**Growing Cyber Threat Exposure**  
Increasing exposure to cyber threats with no comprehensive managed security service to protect operations.

**No Trusted IT Partner**  
Legend needed a single trusted partner who could modernise their environment without disrupting complex daily
