ABOUT THE AGEAS BOWL

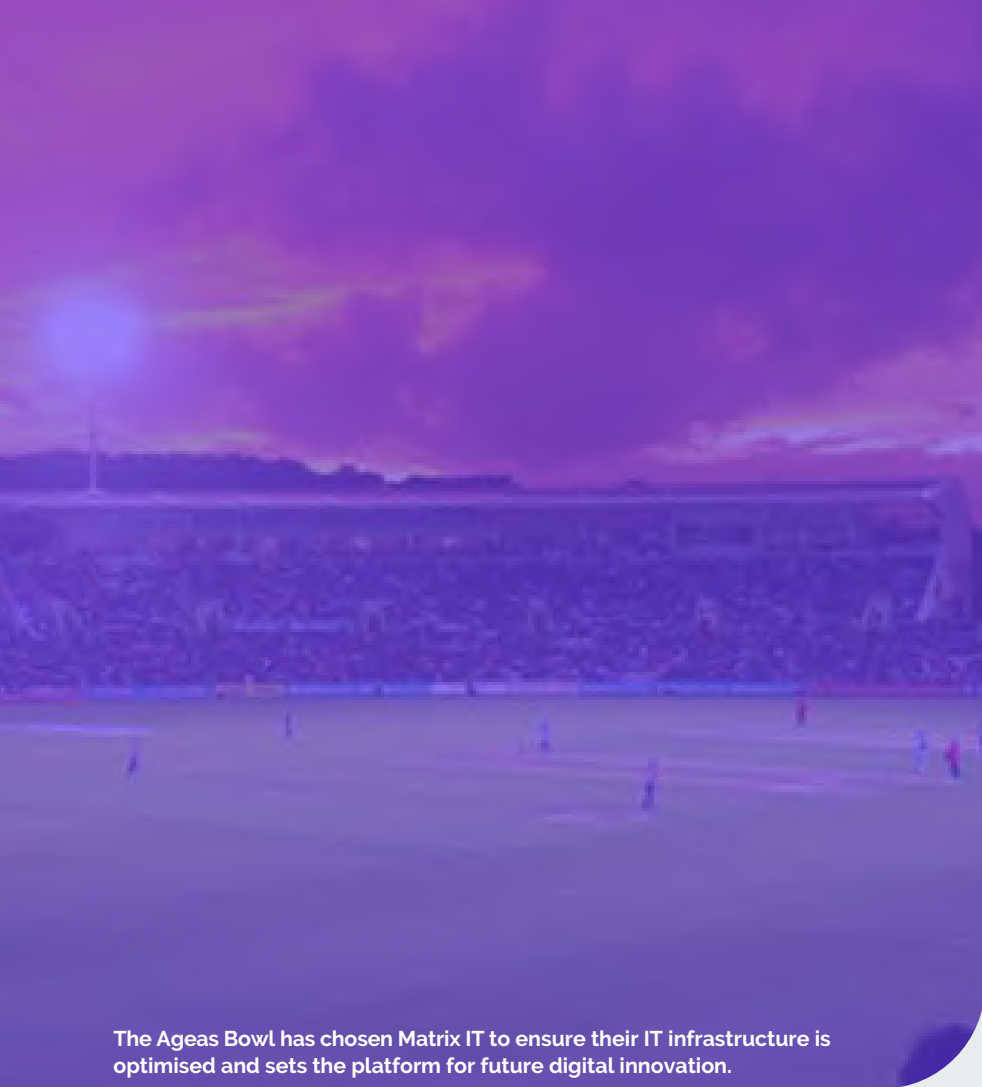

The Ageas Bowl is a cricket ground and hotel complex in Hampshire. As a club and a venue they have long recognised the importance of investing in innovative IT solutions to ensure they are able to provide the best possible fan experience.

The Ageas Bowl chose Matrix IT to support their complex IT infrastructure requirements following an IT manager's resignation. The Ageas Bowl needed an IT partner to provide IT support and security, plus open communication and strategic IT planning.

CHALLENGE

The Ageas Bowl found themselves in a very common situation whereby their IT manager resigned resulting in the need to find a replacement quite quickly.

The Ageas Bowl needed to decide whether to hire a new in-house IT manager or outsource to an IT support specialist. Following a comprehensive tender process, The Ageas Bowl chose Matrix IT to manage their complex IT infrastructure, that included a combination of on-premise and cloud IT systems.

“As a club and a venue we have long recognised the importance of investing in innovative IT solutions to ensure we’re able to provide the best possible fan experience.”

David Mann, Chief Executive

The Ageas Bowl has chosen Matrix IT to ensure their IT infrastructure is optimised and sets the platform for future digital innovation.

SOLUTION

The Ageas Bowl now have a part-time, hand picked onsite technical engineer plus direct access to the Matrix IT service desk during work hours. The Ageas Bowl's hybrid IT infrastructure is also maintained and all users are supported.

Matrix IT took over the management of The Ageas Bowl during a time of transition. Some of the employees work within Sharepoint, whilst others remain on the on-premise server. Matrix IT cloud experts have reviewed The Ageas Bowl's requirements and have identified a course of action to align systems and users to improve efficiency and collaborative working.

Matrix IT also provide IT security including cloud backup resulting in recovery of data in the event of a cloud system failure or malicious attack.

RESULTS

The Ageas Bowl now has access to a team of technical experts supporting their IT infrastructure and users, with a strategic IT plan in place to streamline IT systems inline with business objectives.

Security is also robust with Multi-Factor Authentication enabled, helping to protect The Ageas Bowl in the event of a disaster.

Having a partnership at board level allows Matrix IT to provide strategic advice and support, ensuring that The Ageas Bowl's IT infrastructure is optimised and sets the platform for future digital innovation.
