Secure Technology Infrastructure

Terratron is a retail and hotel management company in Park City, Utah, with properties across the country. They use technology for everything they do, and they're always looking for ways to incorporate new IT solutions to streamline and improve their daily processes and bottom line.

David Jacobsen from Terratron Explains:

"We didn't have an in-house IT department or staff members who were qualified to support the technology that we use. We did use one IT support person, but he wasn't responsive to our needs. Plus, he wasn't qualified to assist us with moving our ERP software to the cloud."

"We had hired Nexus to set up and manage our VoIP phone system, and were very satisfied with the service."

"Because of our positive experience with them, and the fact that they have a local, Park City team, we felt like they would be a good solution for us. We were right!"

Our Team Got Right to Work.

Terratron needed a stable, fast Cloud infrastructure. We moved them to hosted servers and Managed Services. Along with these services and the VoIP Phones, we implemented an Anti-Virus/Anti-Spam Solution, Cyber Security Defense, and Complete IT Support.

David and the team at Terratron are extremely pleased with the services Nexus IT provides:

"We rely on our systems being up and running to manage our business operations. Nexus gives us the peace of mind we need to know that if we have an issue, the downtime will be limited."

"The service that Nexus provides to us is far better than any level we've received from previous IT support companies. They are always quick to respond and to resolve an issue."

"I recommend other business in or around Park City contact the team at Nexus IT Consultants for expert and reliable IT Service and Support."

Stop struggling with your inadequate IT infrastructure, or unreliable IT providers. The team at Nexus IT Consultants will provide a Complimentary Review of your IT needs and resolve the issues that are slowing you down. Contact us at: (877) 660-0089 or info@nexusitc.net
