

Calix

Cloud Migration, Managed IT & Cyber Security

OVERVIEW

Calix needed an IT platform better suited to international growth. Stanfield IT reduced legacy infrastructure overhead, strengthened cyber security and provided 24/7 coverage, dedicated account management and clearer ownership of technology risk.

CLIENT GOALS

- Scale technology without recurring legacy infrastructure issues.
- Provide 24/7 coverage for teams operating across time zones.
- Give security, governance and operational risk one clear owner.
- Provide dedicated day-to-day account management.
- Improve collaboration and support continued international expansion.

THE CHALLENGE

Legacy infrastructure was holding back a growing global business

Older hardware and complex systems limited agility while a growing international footprint required stronger security, clearer risk ownership and dependable support across regions.

01

LEGACY COMPLEXITY

Older hardware and systems made international growth harder to support.

02

ALWAYS-ON OPERATIONS

Teams across regions needed dependable coverage and escalation.

03

RISK OWNERSHIP

Security, governance and priorities needed one accountable partner.

ENGAGEMENT

Cloud migration and managed IT

What Stanfield IT delivered

A controlled, accountable response built around Calix's business outcome.

OUR SOLUTION

Four coordinated workstreams

01 Cloud migration

On-premise overhead was reduced and systems moved to a platform that is easier to scale and manage.

02 Microsoft 365 rollout

Cloud collaboration and more consistent security controls supported teams across locations.

03 Cyber security audit and uplift

Audit findings were translated into practical improvements designed to reduce risk as the business grew.

04 24/7 support and ownership

Coverage, dedicated account management and specialist coordination kept priorities moving.

OUTCOMES

- ✓ Reduced reliance on older hardware and complex legacy infrastructure.
- ✓ Global teams gained a service and escalation pathway across time zones.
- ✓ A dedicated account manager kept priorities and specialist work moving.
- ✓ Cyber security uplift supported practical risk reduction.
- ✓ The resulting platform better supports continued growth and expansion.

“

That was our focus - reducing risks and costs. We have addressed that, plus we now have an IT infrastructure that scales easily. The result is an IT setup more suited to the needs of the business. In addition, it has enabled us to more easily expand into Europe.
