

The Healthy Chef

Managed IT, Cyber Security & AI Automation

OVERVIEW

The Healthy Chef needed reliable support across Google Workspace, networks, user access and shared storage without introducing unnecessary complexity. Stanfield IT created clearer ownership and a stronger technology and security baseline for future automation.

CLIENT GOALS

- Keep everyday IT simple, reliable and professionally managed.
- Support network, WiFi and firewall changes during business moves.
- Manage Google Workspace users, access and administration.
- Improve shared-file access and operational storage.
- Create a sensible foundation for secure AI automation.

THE CHALLENGE

Fast-moving operations left little room for IT distraction

Products, content, ecommerce and customer-facing work depended on reliable cloud tools, networks and shared files. Changes had to be managed without slowing the team or overcomplicating the environment.

01

FAST-MOVING OPERATIONS

Products, content and ecommerce systems left little room for disruption.

02

MULTIPLE PLATFORMS

Google Workspace, networks, users and storage needed consistent ownership.

03

CONTROLLED GROWTH

A stable security baseline was needed before introducing AI workflows.

ENGAGEMENT

Managed IT, cloud and cyber security

What Stanfield IT delivered

A controlled, accountable response built around The Healthy Chef's business outcome.

OUR SOLUTION

Four coordinated workstreams

01

Ongoing managed IT support

Day-to-day issues gained one dependable support pathway so the team could stay focused on products and customers.

02

Network continuity

Internet, WiFi and firewall changes were planned and supported with business continuity in mind.

03

Access, storage and security

Onboarding, offboarding, permissions and NAS support improved account and shared-file management.

04

Secure AI readiness

Reliable systems, clearer access controls and better visibility created a sensible foundation for automation.

OUTCOMES

- ✓ Everyday technology issues now have a clear owner.
- ✓ Network, internet and firewall transitions are handled carefully.
- ✓ User access changes follow more consistent processes.
- ✓ Google Workspace administration supports daily collaboration.
- ✓ Shared-file access is cleaner and easier to support.

“

Stanfield IT has helped us keep our technology simple, reliable and secure. Their support gives our team the confidence to focus on our products, content and customers without being distracted by IT issues.
