

YOUR CURATED TECHNOLOGY PARTNER

Summit Technology creates custom office technology solutions for businesses who are looking to increase efficiency, security, and reliability. No matter your industry, our engineers can build an infrastructure that turns your headaches into a well-oiled machine. One of our best examples of this was a recent project we completed with *Wasatch Taylormade Builders*, a construction management company in Salt Lake City.

Wasatch Taylormade Builders was experiencing major issues in their project management system. An outdated server and software bugs led to high maintenance costs, inaccessible files, and extra personnel to keep things running. Problems like these diminished project results and accumulated unnecessary costs.

Nicky Alamo, one of Summit's System engineers learned the ins and outs of *Wasatch Taylormade Builders*' operation and pain points. Once we saw the big picture, the solutions came naturally. We hooked them up with *Microsoft Sharepoint*, a cloud-based data management and storage system that allowed their files, budgets, and development plans to be accessed instantly from anywhere.

A new server was only half the issue, they still needed a new project management system to replace their unreliable software. To solve this, we got creative and built a custom mobile application that could be used in office or on worksites. This app was built using *Microsoft Power Apps* and *Power BI*, which integrated seamlessly with their new *Sharepoint* system.

Working with our clients to build a custom power app is a wonderful experience. Being able to get exactly what they want in a short time-period keeps everyone happy!

—Nicky Alamo | Systems Engineer, Summit Technology.

The new system brought immediate results. *Wasatch Taylormade Builders* has reduced its IT application costs by **74%** and expects a **188%** return on investment over the next three years. With costs down and a productive system in place, *Wasatch Taylormade Builders* can expect an increase in revenue and development efforts for years to come.

Working with Summit has allowed us to streamline our processes and has enabled us to be much more effective and efficient in the work we do.

—Kory Smith | President, Wasatch Taylormade Builders.

Are you ready to turn your headaches into headway? **Summit Technology** can meet all of your information technology needs, whether that be migrating a server to a cloud-based system or creating a custom-built application.
