

SOFTWARE PROVIDER HOGE 100 BENEFIT FROM CLOUD SOLUTION

- **Industry:** Software
- **Location:** Worcestershire
- **Employees:** 11-50

THE CLIENT

Hoge 100 are a UK-based software company who provide specialist financial software to schools, businesses and charities across the UK. Established over 30 years ago, Hoge 100 work with the top multi-academy trusts and many leading UK businesses. Since moving to hosted software, Hoge 100 have seen significant growth and have a strategy to increase their customer acquisition over the next five years.

THE CHALLENGES

To provide an efficient and cost-effective way for Hoge 100 to add their clients to the cloud

KEY OUTCOMES

1

High speed cloud storage solutions

Extreme performance hybrid and flash storage with exceptional performance guaranteed

2

Latest cloud server technology

To ensure fast and secure service we installed the latest Windows server technology

3

Reduced complexity

Reducing the cloud's complexity makes it easier and more accessible to all their users

Working with EBC Group has enabled us to grow faster, making it simple for us to add clients to our software via EBC group's cloud environment. We have always been able to reach their support team when we have needed assistance and they have always provided a great service.

Liz Wild Director of Business Systems, Hoge100

APPROACH

To supply a highly scalable, reliable and secure cloud platform which will:

- Reduce new tenant provisioning costs and deployment times
- Reduce complexity
- Improve productivity
- Reduce error rate associated with manual provisioning of servers
- Assure compliance

RESULTS

The primary benefits of EBC Group's fully resilient multi-tenant cloud platform are:

- Backup and DR is built into the environment with dynamic Recovery Point Objectives (RPO) by default
- Security focused environment with no multi-tenanted services i.e. shared SQL servers
- Scale up and out capabilities to accommodate business growth for both compute and storage
