
CASE STUDY**HYBRID CLOUD AND IT SUPPORT**

Jersey Energy

Energy | Channel Islands

Learn how Genmar IT boosted Jersey Energy's performance, security, and cost efficiency with a hybrid-cloud solution.

The Challenge

Jersey Energy needed a solution that would improve performance for their distributed team across the Channel Islands while reducing IT expenditure and enhancing their cyber security posture.

Our Solution

We implemented a hybrid-cloud solution that balanced on-premises and cloud resources, optimising for performance, security, and cost-efficiency. This included NAS drive solutions for the Guernsey team.

Key Benefits

- Cyber Security
- Reduced IT Expenditure
- Resilience
- Performance and Productivity

Results Achieved

- Significant cost reduction
- Improved team productivity
- Enhanced resilience and security

”

"The whole process has been praised by my boss, Stuart and how seamless it's been, and how much of an improvement it is on our previous solution, and the NAS drive solution has made the working procedure for the guys in Guernsey infinitely better. A big thanks to everyone, It was a daunting idea to migrate, but it has been hassle-free."
