

CASE STUDY

CLOUD MIGRATION

# Kalex Limited

Manufacturing | Hertfordshire

Genmar IT streamlined Kalex's IT with Microsoft 365 migration, new devices, and enhanced security for better performance and collaboration.

## The Challenge

As Kalex grew from a small operation to an expanding company, their legacy IT systems couldn't keep up. They needed modernised infrastructure, better collaboration tools, and enhanced security.

## Our Solution

We migrated them to Microsoft 365 with SharePoint integration, upgraded their devices, and implemented advanced backup solutions along with AI-driven antivirus protection.

## Key Benefits

- Simplified email management with a consolidated Microsoft 365 system
- Enhanced collaboration through Microsoft 365 and SharePoint integration
- Upgraded devices for improved performance and efficiency
- Strengthened security with advanced backup and AI-driven antivirus solutions

## Results Achieved

- Seamless growth transition
- Improved team collaboration
- Enhanced security posture

*"Our transition from a one-man band to a small but growing company was seamless thanks to Genmar IT. We're confident we made the right decision. They upgraded our systems and technology, enabling us to work more securely and efficiently. We're really pleased with the outcome—everything we asked for was completed, and we have no complaints."*
